Who are we?

Welcome to bloomhouse

We're a friendly bunch of app enthusiasts who love turning great ideas into amazing digital experiences. Our team is made up of talented developers, designers, and strategists who are all about collaboration and creativity.

We pride ourselves on our ability to blend creativity with cutting-edge technology, ensuring that every product we deliver is not only functional and reliable but also beautifully designed and easy to use. Beyond just development, we can step in as your CTO, providing strategic guidance and technical leadership to ensure your product scales and thrives in the market.

At bloomhouse, we believe in building lasting relationships with our clients, driving their success through tailored digital solutions that exceed expectations. Let's create something extraordinary together.

Our App Development Process Flow

Collecting Requirements

01

We start each project with deep research & competitor exploration.

Designing & Prototyping

02

We develop a basic MVP concept & app flow for your approval.

Development

03

Only after the concept has been officially approved, we'll start making the pixels pretty.

Testing

04

Fix bugs, ensure functionality, and verify it meets all user requirements and quality standards.

Completion & Launch

05

Finalize the app, prepare it for release, and officially launch it to the market.

Ongoing Support

06

Provide continuous support, maintenance and updates to ensure the app's optimal performance and user satisfaction.
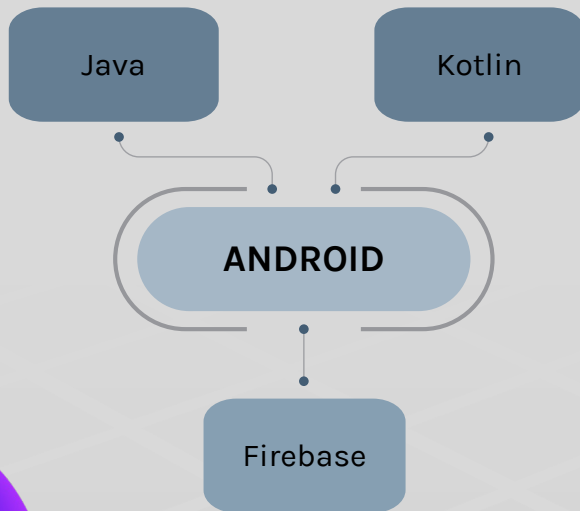

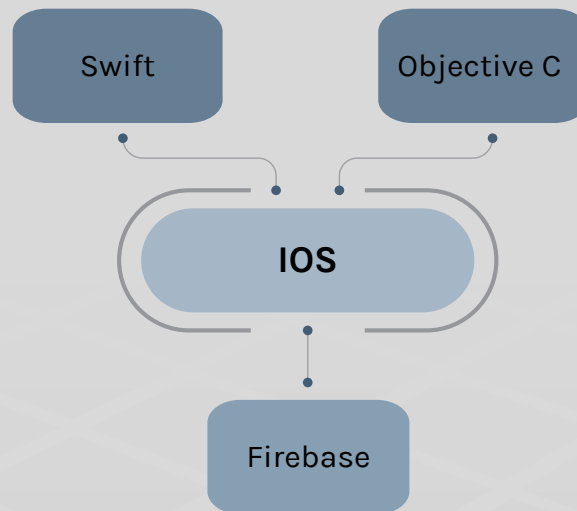

Specifications

CODING PROTOCOL

Java

Kotlin

ANDROID

Firebase

BACKEND

CROSS PLATFORM APP

- o Flutter
- o Django
- o React Native
- o AWS

The technologies we use depend on your app requirements.

CODING PROTOCOL

Swift

Objective C

IOS

Firebase
